Subject: BaP status

Thought I would update you on where we are on BaP. The cancer section (main text) of the document has been completed. I have reviewed the quantitative cancer, sent it back to Karen for revisions, and should have it back soon. I am now reviewing the cancer hazard (Catherine has sent me her material) but it is unlikely we will have revisions done by the end of the day. I am expecting then that we should be able to send you the cancer sections on Monday. You have the response to comments already.

I don't know how much time folks will have next week to work on the non-cancer in view of the public meeting so I think that part will stretch into the week of July 4.

It is going to be awfully tight but we are getting there soon. . .
